EntryPoint Capital, LLC

1350 Broadway

Suite 605,

New York, NY 10018

March 2026

This "**Brochure**" provides information about the qualifications and business practices of EntryPoint Capital, LLC (hereinafter "**EntryPoint**", "**we**", "**us**", "**our**" or the "**Firm**"). If you have any questions about the contents of this Brochure, please contact our Chief Compliance Officer ("**CCO**"), Andrew Alkon, by email at aalkon@entrypointcap.com. Information in this Brochure has not been approved or verified by the U.S. Securities and Exchange Commission (the "**SEC**") or by any state securities authority.

EntryPoint is a Registered Investment Adviser with the SEC. Registration as an investment adviser does not imply that Voyager or any of its principals or employees possesses a particular level of skill or training in the investment advisory business or any other business.

Additional information about EntryPoint is also available on the SEC's website at www.adviserinfo.sec.gov.

Item 2: Material Changes

The Firm is required to identify and discuss any material changes made to its Brochure since the last update to the Brochure. Since the last update was made on March 20th, 2025, the Firm moved its principal place of business which is now located at 1350 Broadway, Suite 605, New York, New York 10018.

Investors are encouraged to review the Brochure in its entirety.

Item 4: Advisory Business

EntryPoint Capital, LLC (hereinafter "**EntryPoint**", "**we**", "**us**", "**our**" or the "**Firm**") is organized as a Delaware limited liability company with a principal place of business New York, New York. EntryPoint is indirectly owned by Michael Bleich through EntryPoint Partners, LP.

We serve as the investment adviser, with discretionary trading authority, to private, pooled investment vehicles, the securities of which are offered through a private placement memorandum to accredited investors, as defined under the Securities Act of 1933, as amended, and qualified purchasers, as defined under the Investment Company Act of 1940, as amended. We do not tailor our advisory services to the individual needs of any particular investor.

EntryPoint currently manages the following private, pooled investment vehicles:

- EP Third Moment International, LP, a Cayman Islands exempted limited partnership (the "**Offshore Fund**");
- EP Third Moment Fund, LLC, a Delaware limited liability company (the **"Onshore Fund**"); and
- EP Third Moment Master Fund, LP, a Cayman Islands exempted limited partnership (the "**Master Fund**").

The Master Fund, the Onshore Fund and the Offshore Fund are herein each referred to as a "**Fund**" and collectively referred to as the "**Funds**."

The Offshore Fund's **"Limited Partners"** and the Onshore Fund's "**Members**" are hereafter collectively referred to as the "**Investors**" where appropriate.

The Funds, together with any other future accounts we may manage, will collectively be referred to as the "**Clients**" within this Brochure.

We do not currently participate in any Wrap Fee Programs.

As of March 11, 2026, we had approximately $700,332,093 in regulatory assets under management "**RAUM**" that were managed on a discretionary basis.

Item 5: Fees and Compensation

The fees applicable to each of the Funds are set forth in detail in the corresponding Offering Documents. A brief summary of such fees is provided below.

Management Fee

The Funds will allocate to Subaccount associated with an Investor a Monthly Management Fee (the "**Management Fee**") to be paid in advance to the Firm or the Firm's designee, equal to 1/12 of 2.00% of the balance, as of the beginning of the applicable month, of the Capital Account associated with such Fund's Subaccount.

The Firm, in its sole discretion, may waive or modify the Management Fee for any Investor.

Performance Allocation

The General Partner will receive a Performance Allocation with respect to each Fund's Subaccount associated with an Investor an amount equal to 20% of the excess of the Net Profits of the Funds

The Firm, in its sole discretion, may waive or modify the Performance Allocation for any Investor.

Operating Expenses

The Funds (and, consequently, each Investor's Capital Account) is responsible for the Operating Expenses of the Funds and will bear (shared pro rata with Additional Funds, if any) the Operating Expenses of the Master Fund, which generally include all expenses, liabilities, and other costs arising out of or related to its operations. Operating Expenses are in addition to and independent of the Management Fee and Performance Allocation.

Any person incurring Operating Expenses on behalf of the Funds may elect to waive such person's right to receive reimbursement from the Funds' assets. In order to be effective, such a waiver must be reflected in a writing signed by such person and indicating the particular Operating Expense for which reimbursement rights are being waived.

The Firm will make all determinations regarding Operating Expenses, including whether a particular item constitutes an Operating Expense.

Organizational Expenses

The Funds (and, consequently, each Investor's Capital Account) is responsible for the Organizational Expenses of the Funds and will bear (shared pro rata with Additional Funds, if any) the Organizational Expenses of the Master Fund.

Item 6: Performance-Based Fees and Side-By-Side Management

We and our affiliates are entitled to a performance-based compensation. As a result, we and our affiliates do not face certain conflicts of interest that may arise when an investment adviser accepts performance-based fees from some clients, but not from other clients.

Performance-based allocation arrangements may create an incentive for us to recommend investments which may be riskier or more speculative than those which we would recommend under a different arrangement.

Item 7: Types of Clients

Our clients are the Funds as described in Item 4 above, and the Funds are generally open to, among others, institutions, pension plans, endowments, high net-worth individuals, financially sophisticated individuals, and other sophisticated investors.

Item 8: Methods of Analysis, Investment Strategies, and Risk of Loss

The descriptions set forth in this Brochure of specific advisory services that we offer to Clients, and investment strategies pursued and investments made by us on behalf of our Clients, should not be understood to limit in any way our investment activities. We may offer any advisory services, engage in any investment strategy and make any investment, including any not described in this Brochure, that we consider appropriate, subject to each Client's investment objectives and guidelines as set forth in the Offering Documents. The investment strategies we pursue are speculative and entail substantial risks. Clients should be prepared to bear a substantial loss of capital. There can be no assurance that the investment objectives of any Client will be achieved.

Methods of Analysis and Investment Strategies

The investment objective of the Funds is to seek attractive risk-adjusted returns. The Funds seek to achieve this investment objective primarily by investing using strategies that focus on long and/or short

positions in equities and equity-related securities or issuers, including exchange-traded funds. More generally, the Funds may purchase, sell, and hold Investments of any type. The Funds are authorized to engage, directly or indirectly, in any investment activity and any activity incident thereto.

Risk of Loss Factors

The following risk factors do not purport to be a complete list or explanation of the risks involved in an investment in the clients advised by us. These risk factors include only those risks we believe to be material, significant or unusual and relate to particular significant investment strategies or methods of analysis employed by us.

An investment involves significant risks, and is suitable only for those persons who can bear the economic risk of the loss of their entire investment, who have limited need for liquidity in their investment, and who have met the conditions set forth in the Offering Documents. There can be no assurances that we will achieve our investment objectives. An investment carries with it the inherent risks associated with investments in publicly-traded stocks and bonds, options, and related instruments, including, without limitation, the risks described below. Each prospective investor should carefully review the Investment Material and the documents referred to herein before deciding to invest with EntryPoint.

Short Sales:

The Firm's investment strategy is expected to result in the Funds' participating in "short sales." When the Funds engage in a short sale, it borrows securities from a financial counterparty (i.e., a lender with respect to the relevant securities) and sells such securities to another person, with an obligation to return to the lender an equivalent amount of the borrowed securities at a later date. Short selling allows the Funds to profit from declines in a security's value.

While short sales may be useful under certain circumstances in the pursuit of potential profit opportunities and/or the mitigation of certain forms of risk, they may result in a theoretically unlimited loss of capital, and can result in significant losses within a relatively short period of time, whether due to price changes, recalls sought and penalties imposed by lenders of the borrowed securities, "short squeezes", unavailability of the securities at the time the Firm desires to close out the short position, or other causes. Financing methods employed by the Funds may involve the economic equivalent of short positions in various Investments, which could have economic consequences substantially similar to those caused by the execution of short sales.

Short sales historically have been, and continue to be, subject to certain restrictions under U.S. federal securities laws. Moreover, under certain provisions of the Dodd-Frank Act, the SEC may propose certain short sale and/or short position reporting requirements that may have the effect of deterring or limiting short selling of U.S. equities in general. Any ongoing or future regulatory limitations on short selling, or any ongoing or future requirements to disclose short sales or short positions, may materially adversely affect the Firm's ability and willingness to implement its investment strategy on behalf of the Funds.

Exchange-Traded Funds:

The Funds may make investments in the securities of ETFs in different asset classes and sectors. ETF securities represent interests in (i) fixed portfolios of common stocks designed to track the price and/or dividend yield performance of broad-based securities indices (e.g., the S&P 500) or (ii) "baskets" of securities related by industry, sector, and/or other shared attributes. ETF securities are traded on exchanges, and the value of ETF securities fluctuates in relation to changes in the value of the underlying portfolio of securities. However, the market price of ETF securities may not be equivalent to the pro rata value of the underlying portfolio of securities. ETF securities are subject to the risks of an investment in a broad-based portfolio of common stocks or to the risks of a concentrated, industry-

specific investment in securities, as the case may be. Furthermore, certain ETFs in which the Funds may invest may leverage their assets, thereby significantly increasing the potential volatility of such ETFs. ETF securities are typically structured as investments in U.S. registered investment companies and, therefore, the Funds' percentage ownership of certain ETFs may be restricted under the Investment Company Act.

Leverage; Margin:

The Firm's investment strategies are expected to involve the use of leverage by the Funds. In particular, the Funds may buy certain Investments on margin or otherwise use borrowed funds to acquire Investments or to support its portfolio. The use of leverage will permit the Funds to hold assets with a value that exceeds its capital.

The amount of leverage employed by the Funds is determined by the Firm, and the Firm is authorized to cause the Funds to employ leverage up to the maximum permitted by applicable law (subject to any limits imposed by any person extending credit or otherwise providing leverage to the Funds). Leverage will amplify the Funds' returns if the Funds earns a return on Investments purchased with borrowed funds that is greater than the Funds' cost of borrowing such funds. However, the use of leverage exposes the Funds to additional risks, including: (i) greater losses from Investments than would otherwise have been the case had the Funds not borrowed to acquire its Investments; (ii) margin calls or interim margin requirements, which may force premature liquidations of Investments; (iii) losses on Investments where the Investments fail to earn a return that equals or exceeds the Funds' applicable cost of borrowing and (iv) due to regulatory limitations on leverage in the U.S., accounts that seek greater than NYSE Portfolio Margin levels of leverage (such as the Funds) are structured with exposure to wholly owned affiliates of broker-dealers. These structures are often less creditworthy and may face different outcomes in broker/dealer bankruptcy, liquidation, or distressed acquisition scenarios. In the event of a sudden, precipitous drop in value of the Funds' Investments, the Funds might not be able to liquidate assets quickly enough to repay its borrowings, further magnifying its losses. The use of leverage by the Funds will increase the volatility of the investment performance of the Fund's portfolio and, as a result, will increase the volatility of the returns experienced by Investors.

The Funds may incur potentially significant expenses, including interest charges and commitment fees, in connection with any leverage that it uses. In addition, the rights of any lenders to the Funds to receive payments of interest or repayments of principal generally will be senior to those of the investors in the Funds, and consequently senior to any rights to receive payments that the Investors have. The terms of any such borrowing may restrict certain activities of the Funds, including the ability to make distributions. In addition, any leverage obtained, if terminated on short notice by the lender, could result in the Firm's being forced to unwind the Funds' positions quickly and at prices below what the Firm deems to be fair value for such positions.

Although the Funds do not anticipate initially using total return swaps to generate leverage for its portfolio, it has retained the authority to do so. Any such leverage employed by the Funds may not be apparent from the balance sheet or other financial statements of the Funds (not all of which may be available for inspection by Investors), and a portion of the leverage employed may be effected through off-balance sheet transactions or methods.

Derivative Instruments:

The Funds may trade all types of derivative instruments without limitation other than any applicable limitations imposed by regulations and/or by the Funds' counterparties and clearing brokers. The exposure of the Funds to any of the Investments may be in the form of derivative instruments. Derivative instruments are financial instruments that derive their performance, at least in part, from the performance of an underlying asset, index, interest rate, or other reference instrument. Examples of derivative instruments include swaps, futures, forwards, options, warrants, options on futures, and swaptions.

Investments and trading in derivative instruments are generally highly speculative and involve various risks that are different in certain respects from, and are possibly greater than, the risks associated with investing directly in the applicable underlying assets or reference instruments. Examples of various risks associated with derivative instruments include market risk, complexity, a high degree of leverage, illiquidity, the absence of reliable price quotes and/or a reliable trading market, unstable correlation between a derivative instrument and the underlying asset or reference instrument, volatility, tax risk, government intervention to influence prices, legal or regulatory uncertainty, and non-performance of the Funds' counterparties (including direct or central counterparties).

Trading derivative instruments might deprive the Funds of certain tax benefits obtained from trading the underlying assets or reference instruments and/or, with respect to over-the-counter derivative instruments, from trading exchange-traded instruments.

Trading in options or warrants involves a risk of loss related to the premium for the option or warrant as well as a risk of loss related to the value of the underlying security or instrument, which loss in either case could be substantial. If the Funds, as purchaser of an option, exercises the option, the Funds will in effect be buying or selling the underlying instrument, and will then be subject to the same risks as are attendant to trading in such instrument. The writing of an uncovered option by the Funds may result in an unlimited loss of the Funds' capital within a relatively short period of time and/or the obligation of the Funds to post substantial additional margin or collateral.

Trading in futures contracts and options on such contracts may be subject to limitations imposed by regulatory authorities and relevant exchanges, which may prevent the Funds from liquidating positions and could subject the Funds to substantial losses. There can be no guarantee that there will at all times be a liquid market for options or derivatives purchased or sold by the Funds, as a market could become unavailable if one or more exchanges or dealers were to stop trading in the applicable options or derivatives. If trading is interrupted in an underlying instrument, the trading of options or derivatives on that instrument is usually halted as well. During any interruption in trading, holders and writers of options or derivatives may not be able to close out their positions until trading resumes, and they may be faced with considerable losses if the instrument reopens at a substantially different price.

Illiquidity of Investments:

Although the Firm expects that the Funds' portfolio will generally comprise very liquid Investments, the Funds are permitted to acquire illiquid Investments and may hold Investments that become less liquid and more difficult to dispose after the Funds acquire them, whether due to market forces, developments involving the applicable issuers, restrictions imposed on the trading of such Investments or the markets on which they are traded, and/or otherwise. Illiquid Investments may involve significant transaction costs when they are disposed, whether because of adverse price movements (whether related to liquidity or otherwise), increased spreads between quotes and dealer mark-ups, and/or otherwise. In addition, illiquid Investments may be difficult to value accurately, and valuations of such Investments may rely on estimates and/or models. There can be no assurance that such Investments will not constitute a material or substantial portion of the Funds' portfolio at any time, and the risks associated with illiquid Investments could have a material adverse effect on the Funds' returns.

Hedging Transactions:

The Firm may seek to limit the Funds' exposure to various risk factors through the use of certain hedging techniques. There can be no assurance that such hedging techniques will be effective or that they will result in higher or more stable returns than would have been the case had they not been employed. Moreover, such hedging techniques will tend to limit any potential gain that might result from an increase in the value of a hedged position.

It should be noted that any hedging techniques employed on behalf of the Funds would be intended only to reduce exposure to certain risks and not to reduce all forms of investment risk. Further, the

Funds are not obliged to hedge any particular form of risk in any particular situation, and the Funds will be free to assume such risks and/or to change its investment policies and practices in any manner as determined by the Firm and without the approval of or notice to the Investors.

Under certain circumstances, hedging techniques intended to reduce certain forms of risk may actually increase risk, whether due to the unintended market impact of hedging transactions, leverage effects associated with hedging positions, unexpected adverse price movements of a hedging instrument relative to the hedged instrument (i.e., adverse changes in the "basis" between the hedging and the hedged instrument), lower liquidity of the hedged and hedging positions relative to an unhedged position, and/or other factors. In addition, even where the Funds seek to hedge a particular risk, a suitable hedging transaction might not be identified by the Firm, not be available to the Funds, and/or not be successfully executed. Moreover, if the Funds were to use derivative instruments for hedging purposes, then an imperfect or variable degree of correlation between price movements of the derivative instrument and the underlying Investment sought to be hedged may prevent the Funds from achieving the intended hedging effect or expose the Funds to the risk of loss.

Technology, Artificial Intelligence and Automation:

Reliance on Technology: When utilizing AI Models, the output received by the Firm's may impact their strategies and techniques and may be somewhat dependent on technology, including hardware, software and telecommunications systems. The data gathering and processing, research, forecasting, portfolio construction, transaction allocation, risk management, operational, back office and accounting systems, among others, utilized by the Firm may be highly automated and computerized. Such automation and computerization is dependent upon an extensive amount of software, software created by third-parties of the Firm and third-party hardware and software. Such dependencies (on third-party software) may continue to increase over time. This software and third-party hardware and software are known to have errors, omissions, imperfections and malfunctions (known as, "Coding Errors." Coding Errors in third-party hardware and software are generally entirely outside of the control of the Firm.

Reliance on Data: When utilizing AI Models, the Adviser's strategies and techniques may be reliant on the gathering, cleaning, culling, mapping and analyzing large amounts of both market and non-traditional (i.e., alternative) data from third-party and other sources. It is not possible or practicable, however, to factor all relevant, available data into forecasts and/or trading decisions. The Firm will use its discretion to determine what data to gather with respect to any strategy or technique and what subset of that data the Adviser's strategies and techniques will take into account to produce forecasts which have an impact on ultimate transaction decisions. The Firm's determination is subject to various legal, regulatory, risk management, operational and counterparty-related considerations and constraints

Item 9: Disciplinary Information

To the best of our knowledge, there are no legal or disciplinary events that are material to an Investor's or prospective investor's evaluation of our advisory business or the integrity of our management.

Item 10: Other Financial Industry Activities and Affiliations

Neither we nor our management persons are registered as broker-dealers, and neither of us has any application pending to register with the SEC as a broker-dealer or registered representative of a broker-dealer, respectively.

Item 11: Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading

Code of Ethics

EntryPoint has adopted a "**Code of Ethics**" that establishes the high standard of conduct that we expect of our employees and procedures regarding our employees' personal trading of securities. Our

employees are required to certify their adherence to the terms set forth in the Code of Ethics upon commencement of employment and annually thereafter. Employees also are required to provide quarterly certifications of compliance with certain Code of Ethics provisions.

The foundation of our Code of Ethics is based upon the following underlying fiduciary principles:

- Employees must at all times place the interests of the Funds and Investors first;
- Employees must ensure that all personal securities transactions are conducted consistent with the Code of Ethics' Employee Personal Investment Policy (described below); and
- Employees should not take inappropriate advantage of their position at the Firm.

Employees are permitted to maintain personal brokerage accounts for the purpose of trading "**Reportable Securities**" (as defined in the Code of Ethics, and which includes a wide variety of investments such as stocks, bonds, fixed income, options, warrants, futures, and derivatives) by seeking approval from the Chief Compliance Officer Employees are prohibited from participating in Initial Public Offerings ("**IPOs**"). Employees are also prohibited from personally, or on behalf of a Client, purchasing or selling securities that appear on the Firm's Restricted List.

Employees must obtain pre-approval from the CCO before: (i) engaging in any outside business activities; or (ii) making any private investments.

We will provide a copy of our Code of Ethics to our Investors, or any prospective investor, upon request, to be viewed on the premises.

Item 12: Brokerage Practices

EntryPoint is authorized to determine the broker-dealer to be used for executing securities transaction for the Funds. In selecting broker-dealers to execute transactions, we do not need to solicit competitive bids and do not have an obligation to seek the lowest available commission cost. It is not our practice to negotiate "execution only" commission rates; therefore, the Funds may be deemed to be paying for research, brokerage or other services provided by the broker which are included in the commission rate.

We shall also have the authority to select and appoint custodians of the assets of the Funds. The Firm's authority is limited by its own internal policies and procedures and each Fund's investment guidelines.

Best Execution

In selecting an appropriate broker-dealer to effect a client trade, we seek to obtain "**Best Execution**," meaning generally the execution of a securities transaction for a client in such a manner that a client's total costs or proceeds in the transaction are most favorable under the circumstances. Accordingly, in seeking Best Execution, we will take into consideration the price of a security offered by the broker-dealer, as well as a broker-dealers' full range and quality of their services including, among other things, their facilities, reliability and financial responsibility, execution capability, commission rates, responsiveness to us, brokerage and research services provided to us (for example, research ideas, analysis, and investment strategies), special execution and block positioning capabilities, clearance, and settlement and custodial services.

Soft Dollars

The Firm may use "**Soft Dollars**". In such cases, Soft Dollar credits, generated by the Fund's trading activities, would be used to purchase brokerage and research services or products that would otherwise have been Fund expense. We intend to keep any such arrangements within the parameters of the safe harbor of Section 28(e) of the Exchange Act.

Neither EntryPoint nor any related person receives client referrals from any broker-dealer or third party. However, subject to best execution, we may consider, among other things, capital introduction and marketing assistance with respect to Investors in the Funds in selecting or recommending broker-dealers for the Funds.

The provision by a broker of research and other services and property to us creates an incentive for us to select such broker since we would not have to pay for such research and other services and property as opposed to solely seeking the most favorable execution for a client. Any research, services or property provided by a broker may benefit any client and such benefits may not be proportionate to commission dollars related to the provision of such research, services or property.

Trade Error Policy

The Firm's "**Trade Error Policy**" provides that any Trade Error should be corrected as soon as possible following discovery of the Trade Error in accordance with the principles and procedures described below. The Firm generally will seek to detect such Trade Errors prior to settlement and promptly correct and/or mitigate them.

A Trade Error may not be resolved by reallocating the trade to another Client. Soft Dollar credits, if any, may not be used to pay for correcting Trade Errors.

Capital Introduction Programs

From time to time, the Firm may participate in "**Capital Introduction Programs**" arranged by broker-dealers, including firms that serve as prime brokers to a Fund managed by the Firm or that recommend the Funds as an investment to their prospective clients. EntryPoint may place its Clients' portfolio transactions with firms who have made such recommendations or provided capital introduction opportunities, if the Firm determines that it is otherwise consistent with seeking Best Execution. In no event will EntryPoint select a broker-dealer as a means of remuneration for recommending the Firm, or any other product offered by EntryPoint (or any affiliate), or affording the Firm with the opportunity to participate in Capital Introduction Programs.

Item 13: Review of Accounts

Our Portfolio Manager and investment professionals continuously monitor and analyze the transactions, positions, and investment levels of the Funds to ensure that they conform with the investment objectives and guidelines that are stated in the Funds' Investment Materials. In these reviews, the Firm pays particular attention to any changes in the investment's fundamentals, overall risk management and changes in the markets that may affect price levels.

Account Reporting

We perform various periodic reviews of each client's portfolio. Such reviews are conducted by our officers.

We will distribute an audited financial report with respect to the previous fiscal year to all Investors within 120 days of fiscal year end. We may also distribute quarterly unaudited net asset value statements, quarter-end performance reports, and a quarterly investor letter to all Investors.

Item 14: Client Referrals and Other Compensation

We do not receive economic benefits from non-clients for providing investment advice and other advisory services. Neither we nor any of our related persons, directly or indirectly, compensate any person who is not a supervised person for client referrals.

Item 15: Custody

We, or our affiliates, are deemed to have custody of Client funds and securities because we have the authority to obtain Client funds or securities, for example, by deducting advisory fees from a Client's account or otherwise withdrawing funds from a Client's account.

We comply with Rule 206(4)-2 of the Investment Advisers Act of 1940, as amended (the "**Advisers Act**") (i.e., the "custody rule") by meeting the conditions of the pooled vehicle annual audit approach. Upon completion of the relevant Fund's annual audit by an independent auditor that is registered with, and subject to inspection by, the Public Company Accounting Oversight Board (PCAOB), we will distribute the Fund's audited financials to Investors within 120 days of such Fund's fiscal year end.

Item 16: Investment Discretion

We have full discretionary investment authority with respect to the Funds, including authority to make decisions with respect to which securities to be bought and sold, as well as the amount and price of those securities.

Item 17: Voting Client Securities

In compliance with Rule 206(4)-6 of the Advisers Act (i.e., the "proxy voting rule"), we have adopted proxy voting policies and procedures. The general policy is to vote all proxy proposals, amendments, consents or resolutions (collectively, "**Proxies**") in a prudent and diligent manner that will serve the applicable Client's best interests and is in line with the Client's investment objectives.

We may take into account all relevant factors, as determined by us in our discretion, including, without limitation:

- the impact on the value of the securities or instruments owned by the relevant client and the returns on those securities;
- the anticipated associated costs and benefits;
- the continued or increased availability of portfolio information; and
- industry and business practices.

Generally, clients may not direct our vote in a particular solicitation.

Clients may obtain a copy of our Proxy voting policies and our Proxy voting record upon request.

Item 18: Financial Information

We are not required to include a balance sheet for our most recent fiscal year, are not aware of any financial condition reasonably likely to impair our ability to meet contractual commitments to Clients, and have not been the subject of a bankruptcy petition at any time during the past ten years.
