Michael Edward Bleich: professional due-diligence dossier

Research cut-off: November 4, 2026. Subject: Michael Edward Bleich, individual Central Registration Depository (CRD) number 4262671.

Prepared for the in-house diligence team from the reviewed official-record investigation. The manuscript brings the completed research together; it does not claim that every employment interval, corporate identity or proceeding has been established.

▼ Contents and supporting appendices

1. Scope and principal findings
2. Identity and career chronology
3. Entities, funds and ownership
4. Investment-management events
5. Financial observations
6. Unresolved questions and next actions
7. Evidence, methods and review

Supporting appendices: Claims and citations, document catalogue, people and entities, events, financial observations, and conflicts and gaps.

1. Scope and principal findings

What the records establish

Official firm records identify Bleich by full name and CRD number in professional roles at Scout Trading, Ophir Partners and EntryPoint Capital. They establish particular role and ownership disclosures, rather than a complete employment history. The earlier Chase, Lehman and Barclays chronology and the alleged Inferent role remain unresolved. ID-C001 ID-C003 ID-C012 SEC-C002 EMP5-C07 EMP5-C08

The main findings are:

Finding	Evidence and limitation
The same professional identifier links Scout, Ophir and EntryPoint disclosures.	CRD 4262671 anchors the subject's identity. Filing and acquired-status dates must not be treated as complete employment intervals. ID-C001 ID-C012 SEC-C002 EMP5-C03
Ownership records contain dated structures and unresolved legal identities.	MEB INC / MEB NY INC wording, ownership-band changes and candidate registry numbers require separate treatment. A September 2009 New York change entry does not establish a rename. EMP4-C09 CORP5-C001 CORP5-C003 CORP5-C005

Finding	Evidence and limitation
Adviser withdrawal records describe different circumstances.	Ophir reports advisory cessation in June 2017. Inferent says it would continue under an exemption in March 2020. EntryPoint's December 2021 withdrawal states a continued-registration eligibility reason and reports that business had not ceased. These are firm-filed administrative records. EP5-C004 EP5-C005 EP5-C006
The Scout Nasdaq settlement is a firm matter.	The $3 million fine is not a separate personal sanction against Bleich. The events chapter distinguishes settlement allegations, firm outcomes, arbitration and administrative filings. EVT-C001 EVT-C002
Financial figures describe different measures.	EntryPoint reports $999,157,153 of regulatory assets under management (RAUM), measured September 30, 2026. The master's gross assets, ERA private-fund assets, offering sales and Form 13F holdings are separate measures. SEC-C007 SEC-C008 SEC-C010 EP5-C011
Court and employment coverage remain incomplete.	Bounded searches do not establish an absence of proceedings or an absence of an unlisted employee role. No later court or payment record for the Scout/Wedbush award was established. LIT5-C04 LIT5-C05 EMP5-C07

These findings support specific statements about the professional record. They do not support an overall clearance, a finding of personal misconduct from a firm settlement, or an estimate of Bleich's personal wealth or income.

PROFESSIONAL PUBLIC-RECORD INVESTIGATION

247	396	26
Registered assertions	Source representations	Conflicts & qualifications

Counts describe the retained register, including unresolved propositions and access observations; they are not counts of verified findings.

Scope and reading rules

The investigation covers historical professional roles, advisers, broker-dealers, funds, special-purpose vehicles, ownership intermediaries, regulatory matters and investment-management litigation. Personal civil proceedings and private home or family details are outside scope. Inferent and unresolved corporate candidates are included as conditional research branches, not established affiliations.

Official public records are the evidentiary basis. Third-party material is a lead only. A filing is attributed to its filer; hosting by a regulator does not make every assertion an independently adjudicated fact. The dossier labels official-record inferences and keeps the records that support them visible.

A missing result is described by its actual search scope. NYSCEF remains an accepted access gap. No authenticated PACER Case Locator or CM/ECF search was performed. LIT-C012 The five prior Library research files were inaccessible and have not been reconciled. Existing legacy repository material was excluded from research by instruction. The follow-up instructions specify what remains needed.

Readers can follow each claim identifier to its supporting records and exact page or field locator. The evidence appendix retains the registered wording and classifications, including earlier formulations that later records qualify. Where an earlier access gap has been resolved, a current-reading note says so.

---

2. Identity and career chronology

The identified professional and the limits of the timeline

The subject is **Michael Edward Bleich, individual Central Registration Depository (CRD) number 4262671**. FINRA's Scout Trading report and Ophir's SEC-hosted Form ADV associate that full name with the same identifier. Those records support joining the professional roles below. Keith Michael Bleich, CRD 2372764, is excluded; a shared surname does not supply an identity link. ID-C001 ID-C012

The chronology consists of dated disclosures. Exact-ID scans of the recovered registered-adviser and exempt-reporting-adviser Schedule A/B tables found Bleich only at Ophir and EntryPoint: 44 rows reduce to 39 distinct disclosures across 18 FilingIDs after export overlap. These schedules cover owners and executives, not every employee or research role. EMP5-C01 EMP5-C02 EMP5-C07

Scout and Ophir: disclosed roles and cessation dates

Scout Trading LLC, CRD 151990 and SEC file 8-68420, reports Bleich as CEO and managing member, with status acquired in May 2009, less than 5% direct ownership and management or policy control. The firm's reported Delaware formation date is May 20, 2009. Its registration period, November 17, 2009 to September 19, 2014, and business-cessation date, July 17, 2014, are separate firm facts; none supplies Bleich's complete employment interval. ID-C002 ID-C003 ID-C010

Ophir Partners LLC, CRD 164729, appears in an earlier recovered exempt-reporting-adviser (ERA) filing submitted August 1, 2012, under SEC file 802-77010. It identifies Bleich as CEO, with status acquired in April 2012. Its July 31 execution date is distinct from submission. His separate ownership row in MEB INC dates to May 2009; that date is not an Ophir employment start. EMP5-C03

Historical Ophir filings qualify the combined CEO/CCO title in the March 2017 Form ADV. The August 30, 2012 and February 20, 2015 snapshots list CEO. The March 25, 2015 snapshot lists CEO and chief compliance officer (CCO), retaining April 2012 in the shared acquired-status field. Later selected filings retain both titles through March 30, 2017. Thus April 2012 cannot independently date the start of CCO duties, and March 2015 is the first retrieved combined-title disclosure, rather than a proved appointment date. EMP4-C04 EMP4-C05

Bleich signed the March 25, 2015 filing as CEO and the December 23, 2015 filing as CCO. The latter signature does not show that he ceased being CEO: the corresponding ownership/executive schedule continued to disclose both roles. Ophir's March 30, 2017 amendment identifies SEC file 801-77121 and reports his direct ownership below 5%, with control. EMP4-C06 ID-C011 ID-C012

Ophir's withdrawal filing, submitted June 29, 2017, says advisory activities ceased June 23. Bleich signed as CCO on June 23; the contact title is CEO, and the filing identifies him in the professional books-and-records custody field. This supports a firm advisory-cessation statement more specific than registration termination. It does not establish corporate dissolution or his personal departure date. The IAPD summary separately reports SEC termination effective June 29, 2017 and an earlier ERA withdrawal effective August 30, 2012. EP5-C005 ID-C020

EntryPoint: current-file roles and the earlier registration sequence

EntryPoint Capital, LLC's October 15, 2026 Form ADV identifies CRD 313946, SEC file 801-130798 and CIK 1992519. It lists Bleich as chief investment officer, with status acquired May 2023, less than 5% direct ownership and control. It also lists him as a member of EntryPoint GP LLC and limited partner of EntryPoint Partners, LP, each with status acquired July 2023 and an ownership band of 25% but less than 50%. SEC-C001 SEC-C002 SEC-C003 SEC-C004

The November 22, 2023, March 27, 2024 and June 27, 2024 ERA snapshots report the same roles and acquired-status months, without settling a proposed earlier employment date. The October 2026 filing separately identifies Lawrence Edward Leibowitz as CEO from October 2020 and Andrew Louis Alkon as CCO/COO/CFO from May 2023. EMP5-C04 SEC-C013

EntryPoint's registration history requires three stages. Its July 12, 2021 initial SEC application used file 801-122062. The December 10, 2021 full withdrawal reports that business had **not** ceased and gives a firm-filed explanation: it registered as a newly formed adviser under the 120-day route, then failed to meet continued-registration eligibility. This is an administrative withdrawal explanation, not a disciplinary finding or business-closure record. INF4-C008 EP5-C004

The May 12, 2022 initial ERA report uses file 802-125863. ERA amendments follow on March 29, May 22 and November 22, 2023, and March 27, 2024. The May 2022 record reports a name update to ENTRYPOINT CAPITAL, LLC while retaining ENTRYPOINT CAPITAL in old-name fields; the LLC name already appears in the December 2021 withdrawal. These fields do not prove a May 2022 legal-name change or a new entity. EP5-C001 EP5-C002

The June 27, 2024 filing marks both initial SEC registration request and final ERA report, a combination expressly allowed by Form ADV instructions. The flags fit a reporting-to-registration transition; overlapping exports count once. They do not settle approval dates, compliance with eligibility or deadlines, or corporate succession. EP5-C003 EMP5-C02

Early-career leads remain separate

Exact Chase, Lehman and Barclays employment dates remain unverified. The historical Ophir career brochure was not obtained, and neither a third-party registration interval nor a firm's dates can replace an individual employment history. A Lehman corporate release dated September 19, 2006, hosted by Cboe, quotes Michael Bleich as head of liquidity strategy. It is an employer statement without the subject's CRD, so its identity link and tenure remain leads. EMP4-C03 EARLY-C005

A stronger source chain supports a limited Lehman connection. A bankruptcy-court opinion identifies Epiq as the debtors' claims agent; Epiq's docket identifies the LBHI schedules filed March 12, 2009 in case 08-13555. Schedule G's restricted-stock-unit agreement table names “Bleich, Michael Edward” at physical page 52, printed RSU page 34 of 413, LBHI Schedules 349. The exact full-name match corroborates the reported association but remains provisional because

it lacks CRD 4262671. It supplies no role, employment interval, award value or vesting determination. It is a debtor-filed contract schedule, not an allowed compensation claim or a finding about the counterparty. EARLY-C001 EARLY-C002 EARLY-C003

Epiq's surname search returned scheduled record 13555000004788, without a claim number or image-document ID. A Stanford-hosted May 30, 2008 Lehman archive document names Michael Edward Bleich in a trading section, but authentication of that standalone document against court or government custody remains incomplete. Neither record closes the employment-date gap. EARLY-C004 EARLY-C006

Successful public FINRA and IAPD individual API requests returned zero hits for CRD 4262671. Those results are distinct from blocked PDF requests and do not establish absence of adverse events, industry exit or a registration end date. FINRA's public-retention rules offer a possible explanation for a missing record, but the applicable reason for this subject is unproved. EMP3-C1 EMP3-C2 EMP3-C3 EMP3-C5

Inferent remains a conditional affiliation

Inferent Capital LLC, CRD 292027 and SEC file 801-112741, is a documented adviser; Bleich's employment, research role, ownership and dates there remain unverified. All 26 Schedule A/B rows across six identified 2018–2019 filings contain no exact subject ID or normalized full-name match. This is a bounded owner/executive-disclosure result, not proof that he was never an employee or head of research. PAR-INF-001 EMP5-C05 EMP5-C07

Recovered initial, July and August 2018 brochures also contain no Bleich or Ophir text. The initial brochure reports no current client assets and expected eligibility within 120 days of effective registration. Those firm disclosures do not identify all personnel. The succession answers in six Part 1 snapshots likewise cannot rule out an earlier transaction outside the form's reporting scope. An Ophir-to-Inferent merger, strategy transfer or personnel move remains unestablished. INF4-C002 INF4-C003 INF3-C004 INF4-C005 INF3-C006

Inferent's March 21, 2020 withdrawal expressly reports Business Ceased=N and says it would continue advisory activities under an exemption. It therefore cannot be described as a closure based on withdrawal alone. The record neither links Bleich to the firm nor establishes its later exemption and operating history. EP5-C006

---

3. Entities, funds and ownership

Reading the ownership disclosures

The ownership bands attach to individual relationships: Code C means 25% but less than 50%; D means 50% but less than 75%; E means 75% or more. Schedule A NA means less than 5%. They cannot be added or multiplied into a precise personal stake or wealth figure. Their DE code means domestic entity, not Delaware incorporation. EMP4-C07 CORP2-DOMESTIC-CODE

Scout, Finch, MEB and NAYS

Scout reports the following relationships. Acquired-status months are not verified transaction dates. ID-C004 ID-C005 ID-C006 ID-C007 ID-C008

Reported relationship	Ownership band	Acquired status	Evidence
Finch LLC in Scout	75% or more	August 2012	ID-C004
MEB NY INC in Finch	50% but less than 75%	August 2012	ID-C006
NAYS LLC in Finch	25% but less than 50%	August 2012	ID-C007
Bleich in MEB NY INC	75% or more	May 2009	ID-C005
Dror Niv in NAYS LLC	25% but less than 50%	May 2009	ID-C008

Scout's audited FY2012 note adds that NAYS LLC and MEB NY Inc owned Scout until August 31, 2012, when Finch became its 100% owner. It gives no respective percentages in Finch. The FY2013 note repeats wholly owned status. Separately, Scout's affiliate narrative carries a June 1, 2012 effective date and says Scout and Ophir were both 100% owned by Finch, under common control and with the same CEO, CCO and CFO. The narrative's date, the audited transition date and the August 2012 schedule months remain distinct; their timing is unresolved. CORP4-C03 CORP4-C04 ID-C009 CORP4-C06

Ophir's March 2017 filing reports Finch as managing member with at least 75% from April 2012, MEB NY INC as managing member of Finch with at least 75% from April 2012, and Bleich as owner of MEB NY INC with at least 75% from May 2009. Historical disclosures narrow the variation: March 18, 2016 still shows MEB NY INC's Finch interest at 50%–less than 75% and NAYS at 25%–less than 50%; June 17, 2016 shows MEB NY INC at 75% or more, with no NAYS or Dror Niv row. This establishes a change in disclosed snapshots, not a proved sale, consideration, transaction date or complete economic exit. ID-C013 ID-C014 ID-C015 EMP4-C08

The intermediary's name is also unresolved. Earlier Ophir filings use MEB INC. From October 30, 2014 through March 18, 2016, one row says MEB NY INC owns an interest in Finch while Bleich's row says he owns an interest in MEB INC. June 2016 and March 2017 use MEB NY INC in both places. The labels cannot be silently merged as a typo or legal rename. EMP4-C09

New York's electronic records identify MEB NY INC., DOS 3772241, incorporated February 6, 2009. The September 25, 2009 Certificate of Change is coded as a service-of-process address change, with no returned name-amendment flag. The retrieved name history does not support using that certificate as proof of a MEB INC-to-MEB NY INC rename. The underlying instrument remains unretrieved, and the SEC rows do not supply DOS 3772241. Moreover, the government dataset expressly disclaims certified-record and current-status effect. CORP5-C001 CORP5-C002 CORP5-C003 CORP5-C004 CORP5-C005

Delaware records supply compatible candidates: Finch LLC file 5142327, formed April 19, 2012, and NAYS, LLC file 4688408, formed May 15, 2009. A separate Finch LLC, file 10521968, formed February 24, 2026, must remain separate. Name and chronology do not identify the owners, prove good standing or complete the join to the regulatory entities. CORP2-ENTITY-5142327 CORP2-ENTITY-4688408 CORP2-ENTITY-10521968 CORP5-C007

EntryPoint's adviser and partnership chain

The October 2026 ADV reports EntryPoint Partners, LP as a direct member of EntryPoint Capital with 75% or more, acquired October 2020. It lists EntryPoint GP LLC with status GENERAL PARTNER from October 2020, ownership code NA and control. Bleich's separate July 2023 GP-member and LP interests each remain 25%–less than 50%. The brochures describe him as an indirect owner through EntryPoint Partners; this does not make either band an exact downstream economic stake. SEC-C005 SEC-C006 SEC-C003 SEC-C004 PAR-B1031410-OWN

Historical March 2023–June 2024 ERA snapshots disclose a longer chain: United Master Investment2, LLC is a Code C member of EntryPoint GP; United Master, LLC is its Code E sole member; United International Bank Corp is Code E sole member of United Master; Richard A. Desich Irrevocable 2005 SD Trust is Code E owner of the bank-labelled entity; South Dakota Trust Company is trustee, Code F. “Sole member” and the ownership codes are retained as filed. These snapshots do not establish current corporate identifiers or exact economic entitlements. EP5-C007

The October 2026 schedule instead lists the trust as a member of EntryPoint GP with Code C, acquired November 2024, and its trustee from December 2020. It also lists Leibowitz as a Code C GP member from October 2020. These are professional ownership and trustee roles only; the trustee field supplies no numerical beneficial stake or conclusion about ultimate beneficiaries. SEC-C015 CORP2-OWN-TRUST

The historical bank label remains unjoined. A GLEIF search returned United International Bank N.V., Curaçao registration 107214, LEI 549300KNXGPJJTQC2Y92. Its different name and corporate form, without a link to the United Master chain, do not establish identity with UNITED INTERNATIONAL BANK CORP. No licensing or nonexistence conclusion follows. CORP5-C008

May 2022 EntryPoint disclosures name Jose Marques and Daniel Lubin as owners and James Pak as CFO/CCO/owner; later records list Lubin as a Code C GP member. Exact CRDs establish that Marques and Pak also occur in Inferent's 2019 records. This professional overlap does not prove Bleich worked at Inferent, or establish a merger, client transfer or succession. Later omission alone does not establish complete economic exit. EP5-C008 EP5-C009

Delaware supplies EntryPoint GP LLC file 3458887 and EntryPoint Partners, LP file 3458856, both formed August 17, 2020. New York data supplies Partners candidate DOS 6795220, with matching foreign formation date; its authority was filed April 10, 2023 and approved April 11, and publication filed July 25 and approved July 26. The correlation strengthens the corporate candidate match but leaves the regulator-to-registry ownership join provisional. CORP2-ENTITY-3458887 CORP2-ENTITY-3458856 CORP2-NY-PARTNERS CORP2-NY-DATES

Fund entities and unresolved offshore form

Ophir Partners Master Fund Ltd, CIK 1555295, is identified in its 2012 Form D as a Cayman issuer. The related-person section lists Michael Edward Bleich as director; Michael Bleich signed as director on July 31, 2012, before the August 1 filing. The full-name entry and Ophir firm records support the professional link. These dates identify a disclosure and signature, not the full directorship period. SEC-D-0001555295-12-000002 SEC-D-0001555295-12-000002-ROLES SEC-D-0001555295-12-000002-SIG

EntryPoint GP LLC and EP Fund GP LLC remain distinct. The latter is disclosed as a financial-industry related person and fund general partner. EntryPoint's ADV names Cayman EP Third Moment Master Fund, LP, private-fund ID 805-7203779905, and feeders EP Third Moment Fund, LLC, 805-8039696809, and EP Third Moment International, LP, 805-5004504749. The domestic feeder's Form D identifies CIK 2016250, Delaware LLC formation in 2021 and prior name EP Healthcare Transformation Fund, LLC. SEC-C006 SEC-C012 SEC-C009 SEC-D-0002016250-26-000001

The international feeder's Form D identifies CIK 2016251, Cayman jurisdiction and 2023 incorporation year, but selects Corporation; the brochure calls it a Cayman exempted limited partnership. These filed representations conflict. No subject-specific Cayman registration certificate or registered statement was obtained to settle legal form or the GP's corporate identifier. EP Fund GP's own registry ID also remains unresolved; CIK 1977777 belongs to Cata Labs Inc. and is rejected for that entity. SEC-D-0002016251-26-000001 CORP2-LEGALFORM-CONFLICT CORP3-C01 CORP3-C03 CORP2-CIK-REJECTION CORP5-C007

The March 2026 feeder Forms D name EntryPoint Capital as investment manager and EP Fund GP as general partner. Both appear under the form's Executive Officer and Promoter role fields, with those clarifications. The filed roles do not establish an individual directorship for Bleich in either feeder. SEC-D-0002016250-26-000001-ROLES SEC-D-0002016251-26-000001-ROLES

Walleye Opportunities Master Fund Ltd, 805-3011135543, appears in EntryPoint's Section 7.B.(2), with Walleye Capital LLC, SEC 801-113731, providing the full private-fund information. This is a limited reporting relationship; it does not establish ownership or employment. SEC-C011

Ophir's March 2017 ADV names OPHIR PARTNERS BEAUFORT FUND LP and OPHIR PARTNERS BEAUFORT GP, LLC. The same fund name appears with 805-5280422629 in Section 7.B.(1) and 805-9412438643 in Section 7.B.(2); the identifiers remain unreconciled. The GP's “Other” identifier 47-5442903 is not relabelled a CRD. New York candidates DOS 4790408 for the fund and 4790401 for the GP report Delaware formation July 14, 2015 and authority filings July 16, but do not supply an owner-linked regulatory join. ID-C016 ID-C017 ID-C018 CORP2-NY-BEAUFORT

SEC submission metadata also identifies Inferent QE Fund, LLC, CIK 1750250, and Inferent Plenary Fund LP, CIK 1769569, with offering filings in August 2018 and March 2019 respectively. These are documented names in the conditional Inferent branch, not Bleich affiliations. Related offering-role information was obtained as provider extracts from official URLs; the attempted original submissions were inaccessible, so those extracts retain their distinct source status in the appendix. INF-C001 INF-C002 INF-C005 INF-C006

Inferent's separate disclosure branch includes Inferent Advisory Holdings, LP, Reflexive, LLC and named executives, without adding a Bleich relationship. Its August 2018 brochure refers to Inferent QE Client, LP and then “The Master Fund,” while the March 2019 ADV names INFERENT QE MASTER FUND, LP, 805-6736389159. That wording ambiguity does not establish a rename, separate entity or identity equivalence. EMP5-C06 INF3-C008

4. Investment-management events

Scout's Nasdaq settlement

Nasdaq accepted Scout Trading LLC's Letter of Acceptance, Waiver and Consent (AWC), case 20100243866-01, on April 7, 2015. Scout, CRD 151990, consented to a censure and a $3,000,000 fine without admitting or denying the findings, before a hearing and without adjudication. Michael Bleich was the managing-member addressee and signed for Scout. The respondent and sanctioned party was the firm; this instrument imposed no separate personal sanction on him. EVT-C001 EVT-C002

The AWC describes a recurring exchange-traded fund (ETF) redemption and short-sale strategy that caused failures to deliver shares on time. According to its settlement findings, Scout submitted redemption orders while insufficiently long the required shares, used the T+6 close-out timetable for bona fide market making although the activity did not qualify, and repeated the transactions to maintain short positions. The findings identify Regulation SHO Rule 204 and Nasdaq Rule 2110 violations, together with inadequate supervisory systems and written procedures under Nasdaq Rules 3010 and 2110. These are findings accepted through settlement, rather than findings reached after a contested hearing. EVT-C004 EVT-C002

The investigative period ran from January 1, 2010 through March 16, 2012. The narrower applicable period ran from November 9, 2011 through March 16, 2012, reflecting Scout's Nasdaq membership. The broader trading narrative provides context; the two periods cannot be treated as interchangeable dates for the action's coverage. EVT-C003

Three Cboe settlement orders

Three original Cboe Business Conduct Committee decisions also name Scout Trading LLC as respondent. Each accepts an offer of settlement without admitting or denying the charged violations. None names an individual respondent. The original orders substantiate three already reported Scout matters; they do not create additional events alongside the corresponding FINRA disclosures. LIT-C001 EVT-C006 EVT-C007 EVT-C008

Matter	Conduct addressed in settlement findings	Original order and outcome
12-0059	Repeated failures to maintain required two-sided, 100-share quotations under Rule 53.23.01(a), approximately June 3–October 4, 2011.	January 28, 2013: censure and $10,000 fine. The FINRA firm's account says the fine was paid February 4, 2013; that payment statement remains firm-reported. LIT-C004 LIT-C005 EVT-C008
12-0099 and 12-0126	Failure to designate a chief compliance officer on Form BD and meet minimum proprietary-trader-principal registration requirements. The order notes designation of a CCO on October 13, 2011 and submission of revised supervisory procedures on May 14, 2013.	Original order dated July 3, 2013: censure and $7,500 fine. FINRA separately reports resolution on June 26, 2013. The relationship between these dates is unresolved. LIT-C002 LIT-C003 LIT-C009
14-0018	Rule 611/Exchange Rule 4.2 supervisory-procedure and surveillance failures, approximately June 1, 2011–December 23, 2013.	May 23, 2014: censure and $5,000 fine. The original title is Decision Accepting Offer of Settlement. LIT-C006 LIT-C007 LIT-C008

The original title resolves the missing-instrument question for 14-0018, while the FINRA regulator and firm descriptions remain source-specific labels. Likewise, July 3 is the original consolidated order's date and June 26 is FINRA's reported resolution date. Neither should silently replace the other. The retrieved Cboe 2009–2015 yearly indexes contained no further Scout-titled link, a bounded archive check rather than a clearance of all years, venues or unpublished proceedings. LIT-C008 LIT-C009 LIT-C010

Wedbush's separate regulatory settlement

Wedbush Securities Inc., CRD 877, was the respondent in AWC 20100243866-02, accepted February 25, 2016. The original names Scout as its clearing client. Wedbush accepted the findings without admitting or denying them and without adjudication. Its sanction was a censure and a $675,000 fine payable jointly to Nasdaq and FINRA, including $337,500 to Nasdaq, with a supervisory-procedure revision undertaking and registered-principal attestation within 60 business days. Completion and payment have not been established. LIT3-C11 LIT3-C12

The FINRA May 2016 bulletin describes the same separate Wedbush sanction and recounts Scout's earlier $3 million sanction. The bulletin's publication month is not the Wedbush acceptance date. The $675,000 is neither a second penalty against Scout nor a personal penalty against Bleich, and it is not added to Scout's fine as though both belonged to one respondent. EVT-C005 LIT3-C11 LIT3-C12

Scout v. Wedbush arbitration

FINRA award 15-02816 names Scout Trading LLC as claimant and Wedbush Securities Inc. as respondent. The statement of claim was filed on or about October 22, 2015. Scout pleaded breach of contract, conversion and accounting concerning a clearing agreement. Those are pleaded causes of action; the award does not identify which supplied its damages theory. LIT3-C03

Official-record inference: the claimant probably is Scout CRD 151990, based on the exact firm name, the same Wedbush clearing relationship and the matching $675,000 regulatory-settlement context. The award supplies no Scout CRD and does not name Bleich. This corroborated join remains an inference, with name collision not fully eliminated. The differently named AC Scout Trading LLC/Newedge matter is not joined to this case. LIT3-C10 LIT4-C05

The panel ordered Wedbush to pay Scout $237,594 in compensatory damages and $1,250 as reimbursement of the nonrefundable filing fee. It specified 4.5% annual interest from August 19, 2014 through and including the award date, then 9% annually from the award date until payment in full. These are awarded obligations, not evidence of collection. No interest total or assumed payment date is calculated here. LIT3-C04 LIT3-C05

Wedbush's counterclaim was denied. Other relief not specifically addressed, including attorneys' fees, was denied. The $9,550 hearing-session fee assessment is payable by Wedbush to FINRA and is distinct from Scout's reimbursement and damages. The award does not reverse the separate regulatory settlement or establish exoneration from its findings. The requested-relief section prints $237,594 for clearing-agreement damages and $237,549 for the alternative conversion/property request; the amount actually awarded is $237,594. Both requested figures are retained without assuming a typographical error. LIT3-C06 LIT3-C08 LIT3-C09

Arbitrator signature counterparts are dated November 16, 2016. FINRA's Date of Service is November 18, and its public award index labels November 18 the Date of Award. Those labels remain separate; the legal date controlling the interest transition has not been determined. Current exact case-number and full-text FINRA queries each displayed the existing award. They are not court-confirmation or payment registries. LIT3-C07 LIT4-C01

No original confirmation, vacatur, appeal or satisfaction record has been obtained for this award. NYSCEF remains an accepted access gap after the guest name search triggered a CAPTCHA; it was not revisited after the user declined that step. CourtListener requests returned access failures, not negative results. Later indexed searches yielded no new target-specific docket. Payment, subsequent proceedings and the award's current legal status remain unresolved. LIT3-C13 LIT4-C02 LIT5-C05

Administrative withdrawals and search boundaries

EntryPoint's October 2026 Form ADV reports no information filed on its criminal, regulatory-action and civil-judicial-action disclosure reporting pages. This describes those pages of that filing. It is not a universal statement that the firm or its personnel have no adverse history. SEC-C014

The three recovered adviser withdrawal filings are administrative records, not disciplinary sanctions. Ophir's June 29, 2017 Form ADV-W reports that advisory business ceased June 23, 2017; Bleich signed as CCO on June 23. It does not establish dissolution or his personal departure date. EntryPoint's December 10, 2021 withdrawal says business had not ceased and explains that a newly formed adviser registered under the 120-day rule failed to meet the eligibility criteria for continued registration. This is the firm's explanation, not an adjudicated compliance finding. EP5-C005 EP5-C004

Inferent's March 21, 2020 withdrawal likewise reports that business had not ceased and that advisory activities would continue under an exemption. It does not establish Bleich's employment there, the precise exemption or subsequent operations. EntryPoint's June 2024 final exempt-reporting-adviser report and initial SEC-registration-request flags are consistent with the transition procedure described in Form ADV instructions; the flags alone establish neither a contradiction nor approval, eligibility or timeliness. EP5-C006 EP5-C003

Bounded official and indexed searches have not established another responsive investment-management proceeding joined to the subject or confirmed corporate chain. FINRA's native award searches returned the known Scout/Wedbush award and an unjoined AC Scout matter; name queries without results do not establish absence of other proceedings. CFTC's native content search returned zero results for six exact quoted professional names, while a positive control returned results. This verifies the operation of that content-search route, not a complete CFTC, NFA or state-regulatory history. LIT3-C01 LIT3-C02 LIT5-C01 LIT5-C04

No authenticated PACER Case Locator or CM/ECF search was performed. GovInfo covers selected court opinions rather than a complete docket or payment registry. The separate New York Law Reporting Bureau interface returned a challenge before a native name query could be submitted. Four court-hosted investment-case candidates were screened and excluded without a subject join. The Triffin/Ophir lead remains excluded because no original pleading established investment-management relevance. Personal civil matters are outside this account. These limits prevent any full-career litigation-clearance conclusion. LIT-C012 LIT4-C03 LIT5-C02 LIT5-C03 LIT-C011 LIT-C013

5. Financial observations

Assets under management and fund values

EntryPoint's latest reviewed ADV reports $999,157,153 of discretionary regulatory assets under management (RAUM) across four accounts, zero nondiscretionary RAUM and $533,470,137 attributable to non-US clients. The filing explicitly measures RAUM at September 30, 2026. Its separate EP Third Moment Master Fund gross-asset-value field reports $799,157,153, but no measurement date is established for that field. The firm's RAUM and one fund's gross asset value are distinct measures; their difference is not attributed to a particular asset, account or liability. SEC-C007 SEC-C008 SEC-C010

Earlier brochure statements report approximately $578,038,743 discretionary RAUM at December 31, 2024 and approximately $700,332,093 at March 11, 2026. EntryPoint's earlier exempt reporting adviser (ERA) Item 2B asset fields report $30 million in May 2022, $32 million in each of three 2023 snapshots and $208,336,695 in March 2024. These are the specific ERA private-fund-assets fields, with no independently established measurement date. They are not relabeled as the later RAUM series. March 2024 selects Item 2B3, while the earlier rows select 2B2; the figures alone support no compliance conclusion. PAR-B956158-RAUM PAR-B1031410-RAUM EP5-C011

Ophir's March 30, 2017 ADV reports $24,250,059 discretionary RAUM in one account and the same private-fund gross asset value. The measurement date is unestablished. The fund-value observation belongs to Section 7B1's private-fund identifier 805-5280422629 and is not reassigned to the separately disclosed 805-9412438643. Equal reported amounts do not make firm and fund measures interchangeable. ID-C019

Form D offering histories

The feeder Form D notices describe cumulative amounts sold in each issuer's offering and reported investor counts. They do not report current net asset value (NAV), current RAUM, net subscriptions or unique natural-person investors. Filing dates below are not substituted for unknown measurement dates, and amendments are not summed. SEC-D-0002016250-26-000001-FIN SEC-D-0002016251-26-000001-FIN

Filing date	EP Third Moment Fund, LLC: cumulative sold / investors	EP Third Moment International, LP: cumulative sold / investors
March 22, 2024	$15,720,000 / 18. SEC-D-0002016250-24-000001-FIN	$10,946,314 / 12. SEC-D-0002016251-24-000001-FIN
June 4, 2024	$15,720,000 / 18. SEC-D-0002016250-24-000002-FIN	$10,946,314 / 12. SEC-D-0002016251-24-000002-FIN
March 14, 2025	$47,245,000 / 21. SEC-D-0002016250-25-000001-FIN	$34,750,715 / 17. SEC-D-0002016251-25-000001-FIN
March 12, 2026	$62,545,000 / 23. SEC-D-0002016250-26-000001-FIN	$47,973,695 / 18. SEC-D-0002016251-26-000001-FIN

Ophir Partners Master Fund Ltd's August 1, 2012 initial notice reports zero sold and zero investors at that filing. It is a historical offering observation, not evidence that the fund never subsequently raised capital. None of these notices establishes Bleich's contributions, distributions or personal

investment balance. SEC-D-0001555295-12-000002-FIN

EntryPoint's Form 13F history

Form 13F values below are US dollars, rounded to the nearest dollar under the applicable SEC instructions. They describe reported securities, rather than total firm assets, complete fund portfolios, NAV, fees, personal wealth or investment performance. A change between quarters cannot by itself establish a return. A NEW HOLDINGS amendment supplements the original period; it is not a replacement complete-period report. FIN-UNIT-001

Report period	Original cover entries	Original cover value, USD
December 31, 2023	1,330	104,310,601. FIN-13F-0001992519-24-000002
March 31, 2024	1,385	111,531,769. FIN-13F-0001992519-24-000004
June 30, 2024	821	68,409,846; separate amendment discussed below. FIN-13F-0001992519-24-000005
September 30, 2024	175,789 as filed	594 as filed; quarantined internal mismatch. FIN-13F-0001992519-24-000008
December 31, 2024	694	237,962,995. FIN-13F-0001992519-25-000002
March 31, 2025	652	218,475,555. FIN-13F-0001992519-25-000003
June 30, 2025	590	199,503,768. FIN-13F-0001992519-25-000004
September 30, 2025	643	258,221,999. FIN-13F-0001992519-25-000007
December 31, 2025	639	256,342,753. FIN-13F-0001992519-26-000002
March 31, 2026	731	341,215,511. FIN-13F-0001992519-26-000005
June 30, 2026	768	412,064,875. FIN-13F-0001992519-26-000007

The September 2024 filing's cover conflicts with its embedded information table: the latter contains 594 entries whose raw value fields sum to $175,789,004. Both the cover and the separate derived reconciliation are preserved. The cause is unknown; no correction or wrongdoing inference is made. The cover observation is quarantined from comparison. This targeted reconciliation does not imply a position-by-position audit of the other quarters. FIN-13F-0001992519-24-000008

The amendment filed August 13, 2026 concerns June 30, 2024 and identifies itself as NEW HOLDINGS: 536 entries and $146,855,443. Its filing date does not turn it into a June 2026 portfolio. No reconstructed June 2024 total is asserted by adding its summary to the original. The latest original period in the retrieved history is June 30, 2026, filed August 13, 2026. The November 4 research cut-off precedes the end of the standard 45-day September-quarter filing window; absence of a September report in that history is not labeled delinquency. FIN-13F-0001992519-26-000006 FIN-13F-0001992519-26-000007 FIN-UNIT-001

Fees, corporate financing and the conditional Inferent branch

The reviewed brochures describe a monthly management fee of one-twelfth of 2% of the beginning-month capital-account balance and a 20% general-partner performance allocation. Both may be waived or modified. The allocation computation sentence is incomplete, preventing

reconstruction of the precise base, hurdles or watermarks. These terms do not establish actual collections, expenses, distributable profits or Bleich's compensation. No income model is applied to RAUM, offering proceeds or ownership bands. PAR-B956158-FEES PAR-B1031410-FEES

Scout's audited FY2013 notes describe a proprietary trading company, wholly owned by Finch, trading its own funds without holding customer balances. Its financing therefore needs to remain distinct from advisory client assets. Note 5 reports repayment to NAYS LLC of $5 million subordinated-debt principal plus any unpaid interest on October 8, 2013. A separate $4 million subordinate note, due in 2014 at 10% annually, remained owed to an unnamed member. The record does not identify that lender as NAYS, MEB or Bleich. Neither the repayment nor the remaining note is treated as personal income or a regulatory penalty. CORP4-C04 CORP4-C05

Inferent remains a conditional entity branch because Bleich's employment, ownership and dates there are unverified. Its 2018 brochures report approximately $31,250,250 client assets under management in July and approximately $62 million RAUM in August, without established exact measurement dates. These company disclosures are not evidence of assets managed by Bleich or an Ophir-to-Inferent succession. INF3-C002 INF3-C003 INF3-C005 INF3-C006

Inferent's March 21, 2020 ADV-W Schedule W2 reports assets of $1,261,506, current liabilities of $986,536, long-term debt to others of $568,700 and shareholder equity of negative $293,731. Reported total liabilities and equity are $1,261,505, leaving a $1 difference from reported assets. The figures remain uncorrected and their balance-sheet measurement date is unknown. They describe the adviser company, not fund RAUM or Bleich's personal finances; reported negative equity is not presented as a legal insolvency finding. EP5-C010

6. Unresolved questions and next actions

The remaining questions require particular records or better access. They cannot be resolved by rephrasing the current evidence. The remaining-work instructions provide exact identifiers, permitted access routes and completion tests.

Question	Record needed and completion test
What were the early employment periods?	Obtain a dated official individual history or an authenticated employment record in an official public filing. Match the subject, role and date precision. Registration and an RSU agreement do not establish every employment interval.
Did Bleich hold a role at Inferent? Was there an Ophir transaction?	Obtain a direct dated role disclosure or professional agreement, and a separate transaction instrument if a transfer is alleged. Overlapping associates and missing owner/executive entries do not settle either question.
What is the complete EntryPoint approval and legal-name history?	Obtain the application, receipt, approval and corporate-name instruments associated with CRD 313946 and SEC files 801-122062, 802-125863 and 801-130798. The dual 2024 flags already have a supported procedural explanation; approval and compliance are distinct.
Which registry entities are the disclosed owners?	Obtain original instruments with an identifier bridge for MEB, Finch, NAYS, the EntryPoint intermediaries and EP Fund GP. Preserve the historical United ownership chain without joining similarly named banks.

Question	Record needed and completion test
What caused the ownership and date differences?	Obtain ownership or transaction instruments for the Scout and Ophir changes. Preserve June/August 2012 and March/June 2016 observations until their specific meanings can be reconciled.
Were there later proceedings or payment on the Scout award?	Obtain a target-linked confirmation, vacatur, appeal or satisfaction record. Keep the award amount, possible interest and actual collection separate.
What remains missing from the fund and adviser originals?	Obtain Ophir brochure 247246, EntryPoint brochure 1061309, the March 2019 Inferent Part 2A original and the relevant Cayman formation/registered-statement or GP-change instruments.
Can the financial discrepancies be resolved?	Obtain an original correction or supporting record for the EntryPoint 2024 Q3 13F and Inferent withdrawal balance sheet. Establish measurement dates; retain the original figures.
Can the prior research be reconciled?	Obtain access to the five referenced Library files. Build a claim-by-claim crosswalk to the retained official originals instead of importing their conclusions.

This action table summarizes the separate instructions; it does not add factual conclusions. The conflict appendix retains all 26 registered issues, including the award's requested-relief figures, Cboe terminology and dates, Scout membership/report-period differences, historical fund names, financial discrepancies and rejected identity joins. Some entries describe historical uncertainty now partly resolved. Current-reading notes preserve that distinction.

Access boundaries

NYSCEF is deliberately left as an access gap under the user's instruction. The separate New York Law Reporting Bureau search also encountered an access challenge and produced no native name-search result. Those are different limitations. LIT5-C02

The searches across published opinions, federal and state sources and the CFTC content index are bounded. They do not cover all court dockets or all agency records. Additional public or authorized records may change the findings. No new responsive proceeding was established by the latest searches. LIT5-C01 LIT5-C03 LIT5-C04

7. Evidence, methods and review

Evidence package

The reviewed register contains 247 assertions linked through 444 evidence references to 396 retained source representations. The entity register has 37 entity entries and eight people; it includes candidates and conditional relationships. Its 67 financial observations and nine event entries are records with stated scopes, not independent estimates of wealth or a count of personal sanctions.

The dossier reproduces every indexed assertion and every evidence link in the claim appendix. It also supplies complete entity, role, relationship, event, financial and conflict appendices. The main narrative selects and explains the substantive findings. Search logs, failed responses and repetitive

disclosure observations remain available in the supporting registers rather than interrupting the account.

Review need	Where to look
Verify a sentence	Follow its claim link to the exact source locator and retained file.
Inspect source authority and preservation	Use the document catalogue for source class, original URL, retrieval time, filing period, accession and SHA256.
Check names and historical relationships	Use the people/entities appendix and its relationship notes.
Trace a numerical observation	Use the financial appendix for metric, units, filing date, measurement date and qualification.
Distinguish sanctions from other events	Use the event register and linked claims; administrative withdrawals have no disciplinary respondent.
Understand an unresolved issue	Read the conflict appendix and the separate follow-up instructions.
Reproduce coverage	Use the unchanged JSON index, SQLite index, CSV tables, search log, and retrieval attempts.

Preservation and interpretation

The records retain original source bytes, URLs, retrieval times in UTC, filing or docket identifiers, page/field locators and SHA256 hashes. Official PDFs, regulator-hosted archive members and extracted text have distinct source classes. A failed response is an access record, not evidence about the underlying case or person.

Some large SEC tables are retained as exact compressed archive members with size, checksum and reconstruction metadata. Target extracts are derivatives. The same FilingID can appear in both registered-adviser and exempt-reporting-adviser exports; that does not create two applications or two events. EP5-C001 EP5-C003 EMP5-C02

PDF locators refer to physical pages starting at one. CSV ordinal conventions are stated in the relevant packet: employment scans use data rows excluding the header, while the withdrawal packet uses header-inclusive ordinals. Source filing and signature timestamps are not converted into UTC when their original timezone is unknown. Retrieval timestamps are recorded separately.

The manuscript follows the editorial standard. Plain English and Humanizer guide readability. Quotations, necessary legal terminology, identity uncertainty and date precision take precedence over stylistic shortening. The source register and originals are unchanged by dossier writing.

Review record and version

The underlying research has separate source and normalized-index QA, linked from independent research QA. Dossier review records appear in the review folder. The dossier's coverage record identifies every narrative citation and every appendix entry. Its release record identifies the input research commit and checks performed for this manuscript.

This dossier is a complete written account of the assembled research as of its stated cut-off. The full-career investigation remains open on the specific questions listed above.

Coverage is incomplete. Read the open questions and access gaps. Source-specific qualifications remain part of every finding.

Version, provenance and opening instructions
